

Role: Chief Product Architect

Experience: 8 - 10yrs

Location: Mysore

Suitable for:

A person who has a passion for technology and has a strong hands on experience on coding and has a large vision.

The Role:

We're looking for hands on engineer, who actively wants to join a start-up. **Great for a (web) technology bhakt, with 8-10 yrs' experience, who now wants a leadership role.** The role will involve **ownership of business technology**, to ensure a simple, scalable and intuitive platform. This comprises three large components: front end E-Commerce, Learning Delivery and Management, JobConnect- facilitating certified users' connect to recruiters. Specifically, you will:

- Build each of the 3 components mentioned above, to end to end maturity - a large, scalable, fantastic user experience platform.
- Work as a part of the senior business team, to ensure the platform actively contributes to sales, CRM and growth of business.
- Plan, hire, groom and manage a star tech team; as well as manage all internal technology requirements (IT security, networking, h/w and s/w)

You will have **immense freedom** to ideate, plan and execute. You'll be part of a high quality team, which is creating a great company from scratch.

With a current, closely bonded team of 30, this is as close to a cushioned entrepreneurial experience as it gets.

You will be located in the calm and beautiful city of Mysore .Your reporting is to the CEO. Note that we need a hand on, strong, TECHNOLOGY leader, and NOT project management skills.

Who you are:

- You have an engineering degree from a good college, with a minimum 8 years' experience - min 5 in internet - based technologies. Pure delivery experience will NOT work.
- You have started out with coding, and understand of good coding practices.
- You should HAVE BUILT COMPLETE PLATFORMS/SUBSYSTEMS
- You are strong in architecture and databases
- You understand web architecture, and how retail portals are architected for usability and scalability.
- You understand web application security features

- You demonstrate high skill in:
 - Java / JEE
 - RDBMS (Oracle / MYSQL), LAMP
 - Design Patterns
- Your interest is in how technology can drive business, rather than technology for its own sake. You understand web architecture, and how retail portals are architected for usability and scalability.

Career Growth & Money:

Starting from day one, your voice will be heard, your plans implemented, and your initiatives will drive the company's growth. As the company grows, so will your responsibilities and your team size. We plan to roll out two more business lines and expand across geographies.

We pay well. Apart from a good cash salary and performance incentives, you can earn stock options – and these are a good deal. But don't let this be your primary driver. Join us for the responsibility, the fun and the sheer amazing achievement of creating a great company from scratch.

We're based out of the calm, beautiful city of Mysore – where we often cycle to work! Write to us asap, at joinflip@learnwithflip.com, with:

- a. Your CV
- b. Confirmation of relocation, and
- c. Specific points of skillset fitment.
